SUMMARY

I'm a Flutter Developer with a strong interest in building clean, responsive, and user-friendly mobile apps. I've worked on several projects using Flutter, Firebase, GetX, Hive, and other tools to create smooth and reliable experiences. I enjoy solving real-world problems through code and always look forward to learning and improving with every new project.

SKILLS

- Flutter
- GetX
- Provider
- Hive
- Drift
- Stripe
- ZegoCloud
- Git
- GitHub
- CI/CD Basics
- Playstore deployment
- Firebase(Auth,Storage,Store,Push notification,Analytics,Crashlytics, Remote Config)

PROJECTS

Flutter, Dart

Luma: Expense & Budget Tracker

Playstore

A premium, production-ready financial management app built for Android. Luma helps users track expenses, manage budgets, and generate detailed financial insights seamlessly, both offline and online.

Architecture: Built with an offline-first hybrid architecture using Drift (type-safe SQL) for instant local read/write operations, synchronized in real-time with Cloud Firestore when connected online. Powered by Clean Architecture with Provider for complete separation of business logic and UI layers.

Security: Implements a custom Flutter Method Channel integrated with native Kotlin code to trigger Android lock-screen authentication, ensuring financial data remains protected at the device level.

Analytics: Includes category-wise expense breakdowns, real-time budget threshold alerts, and beautifully rendered financial insight charts fully developed in Flutter.

Production-Tested: Successfully completed Google Play's closed testing requirement with 15+ testers over 14+ days before public release. Achieved zero crashes post-launch as monitored through Firebase Crashlytics.

Flutter, Dart

Luma Notes - Private Notepad

Playstore

A premium, production-ready private notepad and markdown-based organizer built for ultimate security on Android.

Offline-First & Reactive: Powered by Drift Database (SQLite) for high-performance, type-safe offline storage and reactive data streams, ensuring fluid page transitions and instant note state read/write operations.

Privacy Vault (Biometrics): Integrates hardware-level secure biometric authentication (Fingerprint / Face ID) alongside encrypted PIN protection to secure sensitive meeting notes, financial ideas, and personal journals.

Minimal UI & Folder Sync: Features a modern dark theme, interactive markdown tools (checklists, study notes, meeting drafts), voice-note attachments, and a clean folder hierarchy for seamless organization.

Accident Recovery: Protects workflows with intelligent Local Backup & Restore functionality and a Recently Deleted trash bin for accidental recovery.

Flutter, Dart

Quit Smoking (Puffless – iOS App)

Appstore

Contributed to the development of a health-focused mobile application aimed at helping users reduce and eventually quit smoking. The app allows users to track daily cigarette consumption and expenses, visualize long-term savings, and receive motivational daily tips to support their quitting journey.

Successfully published on the Apple App Store, delivering real-world impact by supporting users in building healthier lifestyles and reducing smoking dependency.

Flutter, Dart	Shouse (Live Streaming Platform) Developed a live streaming application inspired by Airbnb's experience model, enabling users to book professional locations for hosting events and live broadcasts. Integrated Livepeer for decentralized video streaming and configured OBS Studio as the primary encoder to ensure stable, high-quality live broadcasts. Implemented Vercel serverless functions to automatically generate Livepeer streams upon admin approval, and synchronized stream states in Firebase when users initiate broadcasting via OBS, enabling seamless real-time event management and reliable streaming workflows.	
Flutter, Dart	S24 Developed a real-time communication and engagement platform enabling users to connect with each other through direct chat, audio calls, and video calls. The application supports both spontaneous and scheduled interactions, allowing users to initiate instant calls or book sessions based on mutual availability and preferences. Integrated advanced engagement features including scheduled shows for planned events, spontaneous live sessions for real-time interaction, and a newsletter system for structured communication and updates. The platform ensures seamless user experience through preference-based connectivity and organized interaction flows.	
Flutter, Dart	HAOSP Developed a lightweight management application for a small mechanic workshop to digitally track daily operations, including spare parts inventory, oil usage records, expenses, and employee activities. The system simplifies shop management by replacing manual registers with a structured digital workflow. Implemented role-based access for staff and management, enabling controlled tracking of work logs, cost monitoring, and basic operational reporting to improve efficiency and transparency in day-to-day workshop operations.	
Flutter, Dart	Services App (Kubrra Travels) Developed a services application that enabled administrators to create and manage events while allowing users to book tickets seamlessly. The app featured an intuitive interface for event browsing, booking, and ticket management, ensuring a smooth and user-friendly experience for both admins and users.	
Flutter, Dart	Social App Developed a feature-rich social media application designed to provide users with an engaging and interactive platform. The app allowed users to upload their free and paid content, creating a unique revenue-generating opportunity within a social environment. Integrated Stripe for secure and seamless payment processing, ensuring smooth financial transactions for paid content. Additionally, the app featured real-time live streaming functionality to enhance user interaction and engagement. A dedicated trading section was also implemented, enabling users to trade assets directly within the platform. This project demonstrated a blend of technical expertise in payment integration, live streaming, and interactive social media functionalities.	
Flutter, Dart	Sunversum Admin This is app where buyer and seller can interact and the admin will be able to get payment and monitor the customers as well the Distributors activity. I was responsible to develop the admin side from end	GitHub
Flutter, Dart	Innovated Innovations This app was a Ticket Management and I was responsible to make the admin side front end of it	GitHub
Flutter, Dart	Spish Application Developed the front end of a social media Android application using Flutter. Admin can view user activity through charts, and users can post captions, images, and report content.	GitHub
Flutter, Dart	Employee Management System Built an Android application using Flutter, Dart, and SQLite. Admin/Manager can add new employees with security measures, including camera-based log-in/out.	GitHub
Flutter, Dart	Auction System Project Contributed to the development of the Auction System project.	GitHub

EDUCATION

2019 - 2023	BS- Software Engineering CGPA: 3.34/4	Kohat University of Science and Technology, Kohat, Pakistan
2015 - 2018	ICS Marks: 642/1100	Govt. Degree College No. 2, KDA, Kohat, Pakistan

2013 - 2015

Matric

Marks: 672/1100

Al-Nasir Public School and College, Kohat, Pakistan

EXPERIENCE

Feb 2024 - Present **Flutter Developer - DIC**

- Responsible for developing mobile applications in Flutter.
 - Front End
 - Backend Integration
 - Firebase
 - Hive
 - Live Streaming(Agora)
 - Zegocloud(calling and streaming)
- Flutter / Dart

Nov 2023-Feb 2024 **Flutter Developer(Intern) - Tech Induc Innovations**

- Responsible for developing mobile applications in Flutter.
 - Front End
 - Getx
 - Firebase
- Flutter / Dart

Feb-Dec 2023 **Flutter Developer - Work From Home**

- Contributed to the development of the Spish application front end.
 - Implemented the Employee Management System.
 - Worked on an Auction System project.
- Flutter / Dart

ACHIEVEMENTS

Sep-Feb 2023 **Founder (IoT Developer) - NEP/NIC's, KUST, Kohat**

- Successfully developed a health monitoring system, "Smart Health Guardian," winning the pitch competition.
 - Managed a team and the project using LeanTime project management tools.
 - Collaborated with NEP/NIC's Business Development Manager, Muhammad Salman Khan.
- IoT / LeanTime

Feb-Aug 2022 **Android Developer - NEP/NIC's, KUST, Kohat**

- Developed an Android App with local DB, ensuring daily milestones to achieve project goals.
 - Collaborated with Operational Incubation Manager, Anwar-UL-Haq.
- Android / SQLite

COURSES

01-03/2023 **Flutter Development**

- Offered by KBIT board, KUST, Kohat.

08-12/2022 **Flutter Development**

- Offered by KAMYAB NAUJAWAM (NEVTCC), KUST, Kohat.

10/03/2020 **Computer Operator**

- Offered by KAMYAB NAUJAWAM (NEVTCC), Kohat, KPK.

11/09/2015 **Computer Software #24**

- Offered by Fauji Foundation Welfare Division Technical Training Center, Kohat, KPK.

25/12/2011 **CIT**

- Offered by Future Vision Organization (FVO), Kohat, KPK.

CERTIFICATES

12/2022 **Startup Pitching Competition (2nd Position)**

- Participation and outstanding performance in the startup Pitching Competition at NEP-NIC KUST.

10/2022 **Digital Marketing Training**

- Participate in the Digital Marketing Training by Meta, KPIT, DEMO at NEP NIC KUST

LANGUAGES

English - Limited Working Proficiency, **Urdu** - Native or Bilingual Proficiency
